Carcassonne

Cathedrals of Germany

This mini expansion contains 6 well-known cathedrals in Germany. It gives the players the opportunity to gain a respectable number of points with the help of archbishops and travelers.

Spielmaterial

Cologne Cathedral | *Frauenkirche Munich* | *Dresden Cathedral* | *St. Michael's Church Hamburg* | *Ulmer Minster* | *Aachen Cathedral*

6 new land tiles showing cathedrals in Germany. Each of the 6 cathedrals has 3 or 4 road segments starting from the cathedral.

Of course, the real cathedrals are located within their cities. We wanted to make a distinction, since cathedrals are already a part of the first expansion "Inns & Cathedrals." Thus, the cathedrals in this expansion are standing in the fields and fulfill their own function. We are also aware that no cathedrals and archbishops exist in the Protestant church. We simplified the names for easier reading. Thank you for understanding.

Setup

Shuffle the 6 land tiles of this expansion with those from the base game.

*This expansion was developed for the **Carcassonne base game** and its rules still apply. You can combine **The Cathedrals of Germany** with other expansions. However, there will be no official rules for these combinations.*

1. Place a land tile

You draw a land tile and place it according to the usual rules.

2. Place a meeple

After placing a land tile showing a cathedral, you may place your meeple according to the rules. You may place it on a field, a road (as a traveler) or on **the cathedral (as an archbishop)**.

3. Scoring points

Scoring a complete road

When you close a road **leading directly to a cathedral, each tile** in your completed road is worth **2 points** for you.

Special case

If **both ends of a road** are on the same **cathedral**, you count **both endings** separately (so you count the cathedral tile twice).

You score 10 points for the closed road. On the tile with the cathedral, you count both ends of the road separately.

Scoring a cathedral

The cathedral itself will be scored once all roads leading to it are closed. Then, you score **1 point** for each road tile connected to the cathedral. The road segments on the cathedral are still counted separately.

After scoring, return your meeple to your supply as usual.

You score 8 points for the finished cathedral. (Two closed roads: 1 road worth 5 points and 1 road worth 3 points). Blue gets 6 points for the closed road.

Final scoring

At the end of the game, all unfinished roads leading to cathedrals and all unfinished cathedrals give you points. Each traveler and each archbishop gives you **1 point** for each road tile leading to the cathedral.

Special rules in combination with expansions

First expansion: For each closed road with an inn that leads to a cathedral, you get 3 instead of 2 points for each road tile, for your archbishop 2 points instead of 1. Unfinished roads with inns at the end of the game are still worth 0 points. This applies to the traveler as well as the archbishop.
Third expansion: The dragon eats the archbishop when the dragon moves onto a Land tile showing a cathedral.

The cathedrals in detail

Cologne Cathedral (Nord Rhine-Westphalia)

Cologne Cathedral counts among the biggest gothic cathedrals in the world. Its foundation stone was laid down in the 13th century but it was finished only in the 19th.
Today, Cologne Cathedral is a UNESCO World Heritage Site.

www.koelner-dom.de

Frauenkirche (Munich, Bavaria)

The Frauenkirche in the capital of Bavaria is built in the late Gothic style. As early as 1494 it was consecrated as place of worship. With its towers that stand at almost 100 meters tall it is characteristic of the skyline of Munich.

www.muenchner-dom.de

Dresden Cathedral (Saxony)

The Frauenkirche in Dresden was built in barque style between 1726 and 1743. During WWII it was badly hit by Allied air raids and collapsed in the morning of February 15th, 1945. Rebuilding began 1994 and was completed 11 years later.

St. Michaeli's Church (Hamburg)

The protestant main church, Saint Michael, called "Michel" ("Mike"), is the most famous church in Hamburg and a landmark of the Hanseatic town. It counts as most important baroque church in northern Germany and is dedicated to the archangel Michael whose huge bronze statue stands above the main portal.

Ulmer Minster (Baden-Württemberg)

The Ulm Minster was built in Gothic style and has the tallest church tower in the world (161.5 m). Its foundation stone was laid in 1377 when Ulm was still mostly catholic.
Today it is Germany's biggest Protestant church building.

Aachener Cathedral (Nord Rhine-Westphalia)

During a period of 600 years, 40 German kings were crowned in Aachen Cathedral.
Its construction started in 796. In 1978 the cathedral was the first German cultural heritage to be included in UNESCO's world heritage list.
